Assignment 1

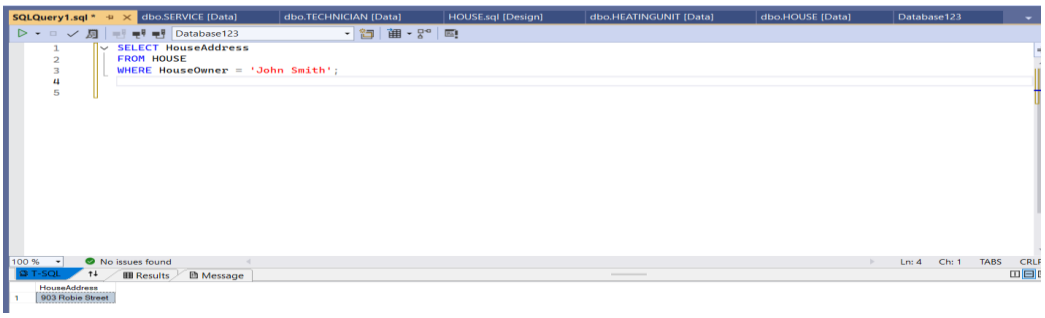
MBAN5550

Pamela Ballesteros

A00494532

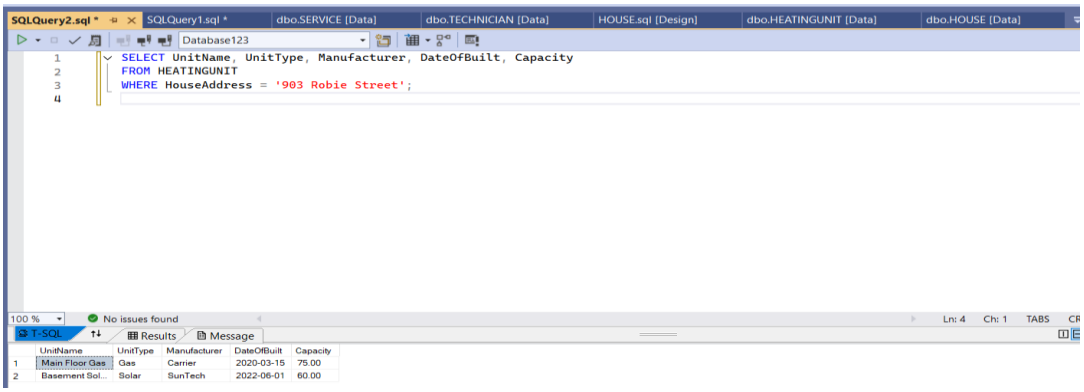
2. Write an SQL statement to find the address of the house owned by ‘John Smith’.

```
SELECT HouseAddress
FROM HOUSE
WHERE HouseOwner = 'John Smith';
```



3. Write an SQL statement to list the information of the heating units in the house ‘903 Robie Street’, including unit name, unit type, manufacturer, date of built and capacity.

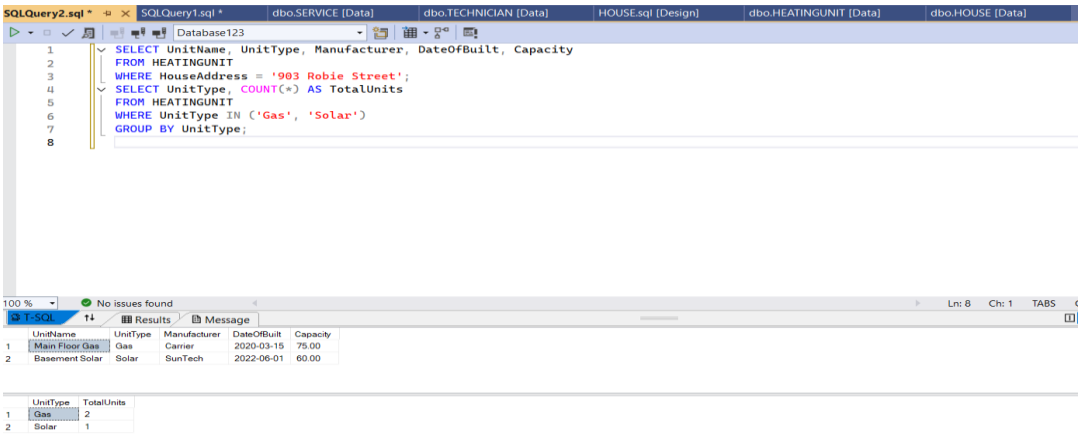
```
SELECT UnitName, UnitType, Manufacturer, DateOfBuilt, Capacity
FROM HEATINGUNIT
WHERE HouseAddress = '903 Robie Street';
```



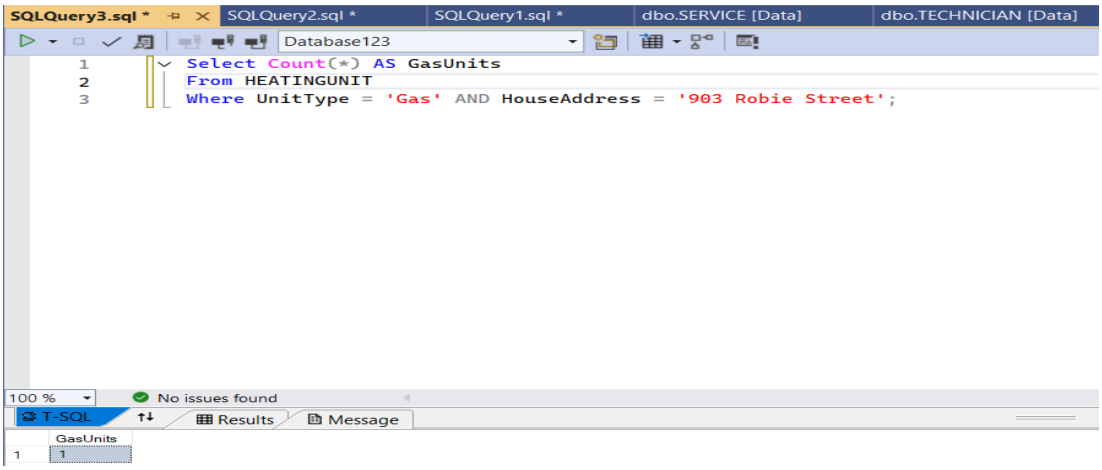
4. Write an SQL statement to find the total number of gas and solar heating units.

```
SELECT UnitType, COUNT(*) AS TotalUnits
FROM HEATINGUNIT
WHERE UnitType IN ('Gas', 'Solar')
```

GROUP BY UnitType;

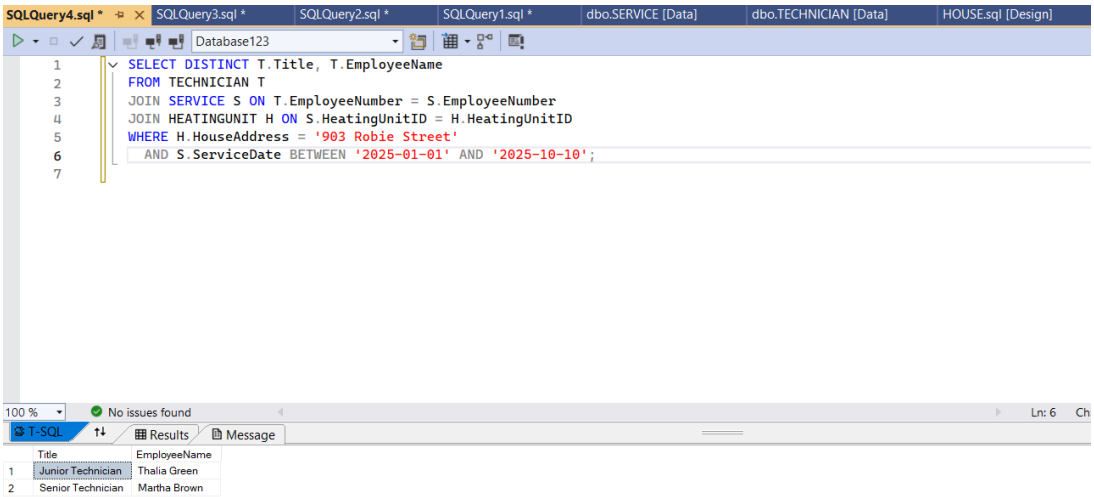


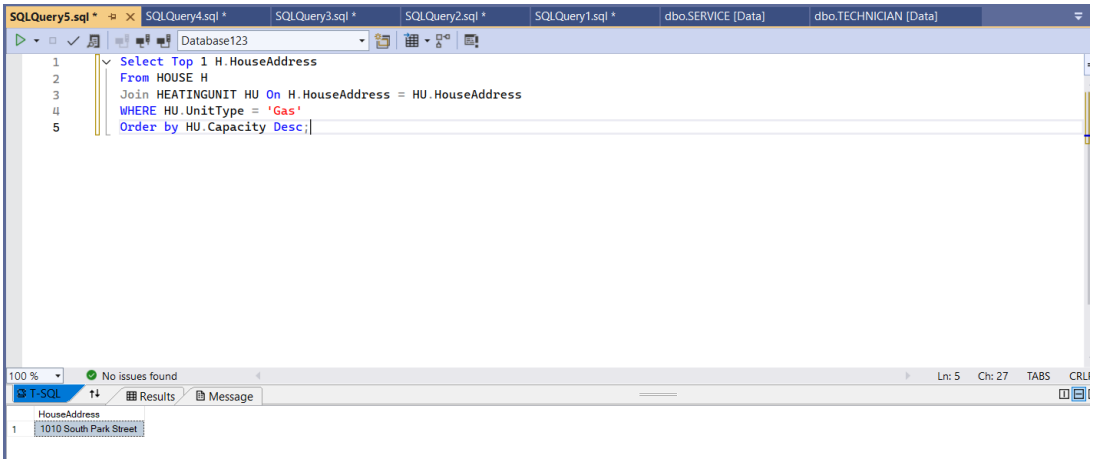
5. Write an SQL statement to find the total number of gas heating units in the house '903 Robie Street'.



6. Write an SQL statement to find the titles and names of the technicians who serviced heating units in the house ‘903 Robie Street’ during the period between ‘2025-01-01’ and ‘2025-10 10’. Remove duplicates in the results.

```
SELECT DISTINCT T.Title, T.EmployeeName
FROM TECHNICIAN T
JOIN SERVICE S ON T.EmployeeNumber = S.EmployeeNumber
JOIN HEATINGUNIT H ON S.HeatingUnitID = H.HeatingUnitID
WHERE H.HouseAddress = '903 Robie Street'
  AND S.ServiceDate BETWEEN '2025-01-01' AND '2025-10-10';
```



7. Write an SQL statement to find the house address where the largest gas heating unit is located.


```
Select Top 1 H.HouseAddress
From HOUSE H
Join HEATINGUNIT HU On H.HouseAddress = HU.HouseAddress
WHERE HU.UnitType = 'Gas'
Order by HU.Capacity Desc;
```
